## Introduction and targets

It is our pleasure to announce the first national seminar organized by the Organic Synthesis Laboratory, Modeling and Optimization of Chemical Processes (LOMOP), Chemistry Department, Faculty of Sciences, Badji Mokhtar Annaba University. This seminar is an opportunity for the scientific community to exchange ideas and experiences, to guide the progress of PhD students, as well as to establish collaborations with national laboratories and research institutes, in order to promote the development of new scientific research. The event will cover a wide range of chemistry topics, from organic synthesis to environmental engineering, catalysis and natural bioactive substances.

## Topics:

**Topic1.** Organic synthesis and molecular modeling (homogeneous catalysis, heterogeneous catalysis, organic synthesis and phytochemistry)

**Topic2.** Environmental engineering processes and green chemistry (analytical chemistry, environmental chemistry and environmental engineering)

**Topic3.** Nanomaterials (electrochemistry and environment)
