

Objectives of the conference

- 1 - Setting a conceptual device related to the topic, in the sociological field.
- 2- Revealing the contribution of digital transformation to overcoming the threat of epidemics.
- 3 - Understanding the aspects of digitization and digital transformation in scientific and economic activity.
- 4 - Formulating the dimensions of expansion and renewal in pursuing digital transformation in Algeria.

Conference topics

Topic1: Quarantine, digitization, and digital transformation is a broad and renewable conceptual device.

Topic2: Digitization was a bypass of the repercussions of quarantine for health and its proper management.

Topic3: The outcomes of digital transformation are a qualitative shift in valuing activity and the efficiency of the human resource during quarantine.

Topic4: Digitization and digital transformation have contributed to achieving quality in higher education despite the repercussions of quarantine.

Topic5: Digital transformation developed “online management” and created a wide space for activity during and after quarantine.

The problematic of the conference

Quarantine as circumstantial isolation means imposing physical and social distancing to overcome fear of expected and certain dangers that will occur. It is a forced solution to ensure physical safety from diseases, epidemics, and dysfunctions of the human body's organs, as well as the disruption of all activities that ensure the continuation of human life in all its aspects. It is an emergency measure whose negative consequences have been overcome, through the use of the outcomes of scientific and technological development, which has also enabled and can effectively overcome urgent health problems and their repercussions on all economic and social aspects for individuals and societies. Therefore, during the period of the epidemic, general quarantine was imposed, and digitization emerged as electronic coordination, and with it emerged - more clearly - digital transformation as a digital representation of all physical activities, even if they are few, for the purpose of saving effort and time, and speed in implementation, as well as achieving results at the lowest costs, considering that it is an electronic quantization of activity and relationships using... Computers and smart devices connected to the Internet, therefore, the process of integrating digitization as a technology into the activity and organization of the work of institutions has come as an utmost necessity, which ensures greater efficiency and better management of the human resource, which ultimately leads to achievement and innovation.

ORGANIZE

National Conference

Digital Transformation During Quarantine “Achievement and Consequences”

Date: April 30, 2024

Conditions and Regulations for participation

Research papers are accepted in Arabic, English and French languages.

All papers must be closely related to the axes of the conference.

All papers must be original; they must not have been presented or published in journals or conferences and not extracted from research or a book

The following paper categories are welcome:

- Full papers 15 pages (including references and appendices)
- Arabic topics should be written in (Traditional Arabic) size14 (title size 16),The English and French topics in (Times New Roman)size 12(title size 14),2 cm margin in each side of the topic
- topics should be use APA citation
- One participant in each (paper/ communication)
- The first page of the paper must include brief information about the intervener.
- Abstract must accompanied in a different language

Important Dates

Deadline for submitting: **20 March 2024**

Notification of Acceptance: **02 April 2024**

Conference Date: **30 April 2024**

Full paper is to be emailed to the following address:

trans.numeriq2023@gmail.com
