14-15 of November, 2023

Cognition and the didactics of comprehension and production in FFL and multilingual contexts

Theme

Research on cognition and its teaching in digital and globalised era is gaining prominence. This tendency is clearly shown in the works of many Algerian researchers and university teachers, particularly in the dissertations that they co-supervised with Legros Mecherbet (2009). In fact, taking into account learners' cognitive functions as well as their linguistic and cultural contexts during the process of learning and teaching has led to the development of cognitive didactics that matches significantly with the digital age and knowledge co-construction (Legros, 2022; Legros, Maître de Pembroke & Makhlouf, 2003). The incorporation of ICTs in instructional programs and proliferation of e-learning in multilingual contexts constitute a immense challenge to the organization and management of educational systems; however, the biggest challenge concerns, firstly the organization of tomorrow's society and education.

The pedagogical responses that could meet the objectives cited above require a preliminary analysis of the linguistic context of each district of the country. It is for this reason that doctorate students from different Algerian and foreign regions who worked with professor Denis Legros on the impact of linguistic and cultural context on the processing of texts and the construction of knowledge will constitute a crucial and original contribution to the current conference major purpose. The implication of these actors in the conference aims at analyzing the use or inclusion of cognitive functions of the learner and his/her linguistic and cultural context on the design of pedagogical activities in the light of the globalised and digitalized world.

26. Pudelko Béatrice, Prof Teluc Canada
27. Sawadogou François, Koudougou Burkina
28. Xu Ming Prof Université Beijing Chine

During the current conference, the guests are invited to base their presentations on their PhD studies about the following topics:

- The impact of the use of cognitive functions on FFL learning and teaching
- The effect of the incorporation of the linguistic and cultural context on learning/teaching
- Didactic and pedagogical research for supporting numerical processing of texts.
- Supporting online learning and e-learning (digital) in the globalised world

Organization committee :

President of the organization committee: Dre Ahlem Labani

Abdou Mohamed Chemseddine, Jijel University

Radjah Abdelouehb, Jijel University

Boudina Youcef, Jijel University

Submission and important information

The communication proposal should at maximum include **500 words** and at least 5 keywords. The proposal should be sent at least before 15th **of october 2023** to the following contact addresses: abdelaziz.sissaoui@univ-jjel.dz .Kellil.assia@univ-khenchela.dz

Notifications of the scientific committee evaluation of the proposals will be sent on 30th **of october 2023; as for the announcement of the final conference schedule will be on 14th /15th of November 2023**

The time allowed for each communication is 10 minutes followed by 10 minutes discussions.
